waxing & sugaring

WAXING: Wax is applied warm and with the direction of hair growth, but removed against the grain of hair growth. Wax will remove live and dead skin cells.

SUGARING: Sugaring paste is applied lukewarm and is removed in the same direction hair grows, putting less strain on the skin, and less pain (whew!). Sugaring only adheres to dead skin; it does not attach to live skin cells.

A ¼ inch of hair growth is necessary in order to achieve the best results. Due to extreme skin sensitivity, we are unable to provide waxing to clients currently on Renova, Retin-A or Accutane.
